

Your heart beats for innovation and sustainability? JOIN US NOW!

In Quantron innovation and experience work together every day towards a more sustainable mobility. In our company you will find a flexible working environment with a unique high level of motivation. We have a fast-paced, exciting, and collaborative culture where you will have the possibility to quickly implement your ideas, with a low level of hierarchy and bureaucracy.

E-Vehicles Service Field Technician – Flying Doctor (m/f/d)

Full-Time

Key Tasks:

- Carrying out of maintenance and repair works in the field and at the customer workshops on high-voltage BEV (battery electric vehicles) busses
- Diagnostic, troubleshooting and elimination of vehicle failures
- Setup and commissioning of diagnostic equipment
- Contact person for quality management
- Customer contact and on-site support for service partners in handling repairs

Requirements:

- Successfully completed education as a mechatronics technician.
- Knowledge of the automotive industry (e-mobility is an advantage).
- Experience in servicing, maintaining, and repairing of commercial vehicles (truck) and busses.
- Technical understanding and analytical thinking skills.
- Flexibility and a sense of responsibility as well as reliability and the ability to work in a team
- Independent and careful way of working with a view to safety and cleanliness

- Good knowledge of English (Chinese and German is a plus)
- Available for traveling

Why us?

- We work on sustainable mobility
- Combining expertise with passion you can quickly grow with us both in terms of skills and responsibilities
- For us Teamworking comes before hierarchy and approval process
- Flexible working schedule

We consider diversity as a crucial ingredient for our growth. As an equal opportunity employer, we base our talent acquisition decisions on skills and experience. What we value is energy, courage, and reliability. We look forward to receiving your application and learn something more about your story.

Join now the e-revolution in passenger and cargo transportation! 2022 is the year to #GROWWITHUS!
